**“Futuristic Trends in Sports culture in India by ‘SRC’ with
collaboration if ‘SWAL’”**

REPORT

The NGO which has been result of a research carried out after three dedicated years by Dr. Pandey, has come out with many revealing and eye opener arguments as to why India despite having more than a billion population, lags behind in medal talles at international sporting events where as other countries with small population make their mark felt in such events. Besides, this NGO also believes that the sports be looked from different glass and only medal and money or career should not be the goal of participating in sports, rather people should see the sports as catalyst in shaping a character moved with values. Today we encounter moral turpitude at every level, and sports has been only potent weapon to deal with such issues.

Objective

Sports a way of life NGO is dedicated to promoting sports literacy in India especially among villagers and those parts of town where people are least aware of sports, as it believes that sports talents could be spotted from such places.

The NGO will be moved with a vision to approach parents and give call to all parents to encourage their wards to participate in one sports or other especially various athletics where India is lagging behind in medal tally despite having more than a billion population.
